

CONTENTS

1. THE EMERGENCE OF SEMANTICS	17
1.1 Introduction	17
1.2 Various ways of viewing Semantics	18
1.3 Linguistic Semantics	20
1.3.1 Linguistics (Continental)	20
1.3.1.1 The 19 th century	20
1.3.1.2 The 20 th century	21
1.3.1.3 The year 1916	22
1.3.2 Linguistics (American)	23
1.3.3 Linguistics in the UK	27
1.4 Philosophical Semantics	28
1.4.1 Logical Positivism-Ordinary Language Philosophy	28
1.5 Liaison Between Philosophy and Linguistics	29
1.6 Linguistic semantics and philosophical semantics	31
2. SCOPE OF SEMANTICS	33
2.1 Introduction: Semantics as a branch of semiotics	33
2.2 What is meaning?	35
2.3 The subject-matter of semantics	35
2.3.1 Lexical meaning (word-meaning)	36
2.3.2 Sense relations	36
2.3.3 Sentence relations	37
2.3.4 Grammatical meaning	38
2.3.5 Reference-Truth conditions	39
2.4 What is not (or need not be) part of semantics	39
2.5 The epistemological status of semantics	40
2.6 Discussion and exercises	41
3. THE CONCEPT OF MEANING	43
3.1 Introduction	43
3.2 Word-meaning or lexical meaning	43
3.3 The smallest unit of meaning	44

3.4 Contextual meaning	46
3.5 Word as a linguistic sign	49
3.6 The semiotic triangle	50
3.7 Meaning at the level of the word	51
3.8 Mental representations of word meaning: Indeterminacy of concepts .	54
3.9 What is a concept?	57
3.10 Sentence semantics	58
3.11 Some basic concepts: Sentence, utterance, proposition and meaning	58
3.11.1 Sentence	59
3.11.2 Utterance	60
3.11.3 Proposition	62
3.12 Review	63
3.13 Discussion and exercises	64
4. FROM WORD TO WORLD: Sentence Meaning	69
4.1 Introduction	69
4.2 Meaning between language and the world	69
4.3 More on proposition: Technical specification	70
4.4 How we analyse propositions	73
4.5 Predication	74
4.6 Sense and reference: An overview	75
4.7 Reference and definite descriptions	76
4.8 Singular and general referring expressions	81
4.8.1 Definiteness and indefiniteness	82
4.8.2 Definiteness and presupposition	85
4.9 Non-referring definite noun-phrases	86
4.9.1 Attributive use of definite descriptions	86
4.9.2 Predicative use of definite descriptions	90
4.10 Equative or identity sentences	92
4.11 Opaque contexts	98
4.12 Referentiality as borne by NPs	101
4.13 Deixis: General	102
4.13.1 Categories of deixis	104
4.13.2 Manifestation of deixis	106
4.14 Denotation	107
4.15 From Proper Names to deictics	110
4.16 Reference Theory of Predication	112
4.17 Sense	113

4.18 Compositionality	117
4.19 Discussion and Exercises	124
4.20 Further Reading	131
5. FORMALISING SENTENCES: Logical Semantics	133
5.1 Introduction: The rationale for formalisation in semantics	133
5.2 Historical Background	134
5.3 A Revolution in logic	135
5.4 Logical formalism	137
5.5 Basic Concepts	141
5.5.1 Basic set theory and set operations	141
5.5.2 Relations between sets	142
5.5.3 Operations on sets	143
5.6 Levels of logical analysis	145
5.6.1 Propositional Logic (Propositional calculus)	146
5.7 Simple and compound sentences	147
5.8 Truth	148
5.9 Meaning as truth-conditions	152
5.10 Propositional logic	155
5.10.1 Conjunction ($\&$ or \wedge)	156
5.10.2 Disjunction (\vee)	157
5.10.3 Implication (\rightarrow or \supset)	158
5.10.4 Equivalence (\leftrightarrow , \equiv)	159
5.10.5 Negation (\sim or \neg)	160
5.10.6 Summary	161
5.10.7 Rules of inference	162
5.10.8 Remarks on the syntax of logic	163
5.11 Logical properties of sentences and logical relations	165
5.11.1 Analytic and Synthetic sentences	165
5.11.2 Tautologies and contradictions	167
5.12 From logic to semantics: interpretation, limitations	167
5.13 Discussion and Exercises	170
6. FROM PREDICATES TO EVENTS	173
6.1 Introduction	173
6.2 Predicate logic	174
6.2.1 From the Aristotelian Syllogism	174
6.2.2 ...to Predicate Logic and its logical vocabulary	176
6.2.3 Predicate logic: inside the sentence	177

6.2.4 Function	181
6.2.5 Predicate Structure	183
6.2.5.1 Thematic roles	185
6.2.6 Quantifiers	187
6.3 Logical properties of predicates and their relations	190
6.4 Indexical expressions in logical semantics	191
6.5 Interpreting sentences in logical semantics	193
6.6 Intensional contexts	195
6.6.1 Modal Logic	196
6.7 Events, actions and states	198
6.8 Situation types	200
6.9 Eliminating ambiguity; limitations	202
6.10 Advances in logic in cognitive science	203
6.10.1 Default reasoning	203
6.10.2 Default values	203
6.11 Discussion and Exercises	206
7. FROM WORD TO WORD: Word meaning	209
7.1 Introduction	209
7.2 Oppositeness of meaning	212
7.2.1 On antonyms in general	212
7.2.2 Complementaries	214
7.2.3 Gradable antonyms	217
7.2.4 Evaluative antonyms	224
7.2.5 Converses	226
7.2.6 Reverses	229
7.2.7 Some characteristics of oppositeness	231
7.2.7.1 Purity of opposition	232
7.2.7.2 Intrinsic binarity	232
7.2.7.3 Symmetricality of oppositeness	232
7.2.7.4 Matched language variety	233
7.2.8 The various types of opposition schematised	233
7.3 Polysemy and Homonymy	234
7.3.1 General introduction: Ambiguity, Comparison of the two phenomena	234
7.3.2 Polysemy	239
7.3.3 Homonymy	242
7.4 Synonymy	245

7.5 Hyponymy	248
7.6 Semantic features and decompositional theories of meaning	250
7.6.1 Some problems of decomposition	252
7.7 Selectional restrictions	253
7.8 Modulation of lexical meaning-lexical pragmatics	254
7.9 Discussion and Exercises	258
7.10 Further Reading	266
8. FROM SENSE RELATIONS TO SENTENCE RELATIONS	267
8.1 Introduction	267
8.2 Sense relations and reference	267
8.3 Entailment	268
8.4 Paraphrase	271
8.5 Presupposition	271
8.6 Meaning postulates	272
8.7 Discussion and Exercises	275
9. MEANING IN COGNITION: Meaning within the mind	277
9.1 Introduction	277
9.2 Prototypes and categories	278
9.3 Stereotypes	281
9.4 Lexical fields or semantic fields, and frames	283
9.4.1 Lexical fields, semantic fields	284
9.4.2 Frames and scripts	285
9.5 Discussion and Exercises	288
9.6 Further Reading	289
Concluding	291
REFERENCES	293
