PREFACE	9
Unit 1. What is Forestry?	11
Unit 2. Soil profile	14
Unit 3. Soil chemistry and plant nutrients	18
Unit 4. How plants get water and nutrients	22
Unit 5. The morphology of a flower	25
Unit 6. Cell structure of the leaf	29
Unit 7. Conditions necessary for plant growth	33
Unit 8. Forest floor life	37
Unit 9. The useful forests	41
Unit 10. Why trees are important?	45
Unit 11. The tree in the forest	48
Unit 12. Raising young trees	52
Unit 13. Trees and their timbers	55
Unit 14. The tree and the forester	58
Unit 15. Harvesting timber crops	62
Unit 16. Plant reproduction	65
Unit 17. Soil erosion	70
Unit 18. Coniferous forests, evergreen regions	73

Unit 19. Tropical forests – Magical rainforests	77
Unit 20. How is the forest affected by acid rain?	83
Unit 21. Weeding and cleaning	87
Unit 22. Types of wood – PART I	92
Unit 23. Softwoods – PART II	99
Unit 24. The hidden world of tree roots	104
Unit 25. Fire behavior	111
APPENDIX I	117
APPENDIX II	120
